Thanakrit Panich

QA Tester Intern | Computer Engineering Student

064-3386245 | thanakrit.pac@spumail.net

Available for internship: 5 Jan - 30 Apr 2027

PROFILE

Fourth-year Computer Engineering student seeking a QA Tester internship. Hands-on in functional testing for browser-based applications, with a focus on clear test cases, boundary values, observed results, and evidence-based reporting.

CORE SKILLS

- Functional testing | Test case design | Boundary Value Analysis | Positive and negative testing
- Test evidence and reporting | UI validation | Figma | PyQt5 | Grafana | InfluxDB
- Familiar with SQL and API testing concepts

SELECTED PROJECTS

ShopLab QA Practice Project | 11 - 16 Oct 2026

Designed and executed 28 functional test cases for Login, Registration, Cart and Checkout. Applied boundary-value and positive/negative testing; recorded 27 PASS results and kept one conflicting observation open for investigation.

VoiceBoost AI | UX UI Design

Designed the complete theme and UX/UI for a PyQt5 desktop application that reduces meeting noise with DeepFilterNet and provides adjustable microphone boost controls.

SmartHydroPonic Farm | Data Dashboard

Built a Grafana dashboard using InfluxDB sensor data to monitor temperature, pH, humidity and light in near real time.

SabaiTAX | UX UI Design

Designed approximately 30 mobile app screens and prototype flows in Figma for an annual tax-calculation application.

EDUCATION

Bachelor of Engineering candidate

Computer Engineering | Faculty of Information Technology | Sripatum University | Fourth year

CERTIFICATIONS

Huawei Cloud HCCDA-AI

Certified Developer Associate | Valid until 21 Jul 2029

AWS Academy Graduate

Machine Learning Foundations | 20 hours | Issued 04/02/2026

QA PROJECT SNAPSHOT

28 test cases

27 PASS | 1 Needs Investigation | Login | Register | Cart and Checkout
